A message from the General Chairs:

The joint conference between the Frequency Control Symposium and PDA Exhibition and the Precise Time and Time Interval Meeting will afford both attendees and exhibitors associated with each group a unique opportunity to interrelate both technically and socially.

The meeting location at the Hyatt Hotel in Vancouver will provide attendees with a wonderful venue: Vancouver attractions include Stanley Park, Gastown, Chinatown, and Granville Island. The Hyatt is located in the heart of the city, walking distance to many fine restaurants, shops, etc. It is also the departure city for many Alaskan Cruise Lines. We strongly recommend attendees plan to spend a few extra days in Vancouver to allow time to enjoy the many attractions that the city has to offer.
